

Tldr:

The Role: Senior Frontend Developer. **Country of Employment:** Hungary.

Workplace type: Full Remote. **Employment type:** Full-time employment

The Mandate:

Senior React Frontend developer.

Our innovation agency was founded for making online digital experience better, so we help others originating and cultivating their innovation culture, especially with digital products. We focus on delivering memorable digital experience, that are integrated and comprehensive, straight forward, and easy to use.

Over the past years we have built several mockups and helped several banks to transform and build up projects rapidly from scratch.

In the development team we have 2 fathers working from home, and now we seek for the 3rd colleague to support the increasing projects.

That's where **you** come in.

As a successful applicant, you will be joining the team as a 3rd member, where you will be working alongside other engineers and client facing UX specialist, working on different aspects of the solution, and you will be responsible to prototype and development final system throughout various projects.

Interested? Here's what we're looking for:

We are looking for a senior React developer who will be working on various international projects, with a small amount of web thick client interfaces applications.

Responsibilities:

- Design and build full featured, testable, efficient dynamic prototypes and production applications, using the best development practices
- **Frontend** developments on Javascript stack (90% **React**)
- Collaborate with a team to define, design, and ship new features
- Build powerful, fast, high-quality applications that can be easily upgraded
- Think and work together with an international team
- Develop **clean code**, enforce **automated and unit testing**
- Continuously **improve** your application development skills
- Participate actively in end user presentation boards or client workshops
- Development of mobile first solutions (mainly React Web, you can also taste React-Native)

Requirements:

- Active, minimum **2 years frontend** development experience with **React**
- Solid understanding of HTML5, CSS4 design concepts and UI/UX standards

- Professional understanding of responsive applications and able to cope with different screen sizes
- Prototype-driven **agile** development experience, assembling fast proof-of-concept solutions
- Passionate commitment to programming and **clean code** (at least some of these you already live up to: SOLID, DRY, KISS, YAGNI)
- Openness and activity to learn about and use new technologies
- Integration into agile teamwork, active participation in shaping development processes.
- Fluent business English in IT domain

What is a plus?

- Active **TypeScript** knowledge
- Experience with writing **tests** for JavaScript
- Knowledge of **agile** development methodologies
- FinTech experience
- React-native experience
- IT programming experience in any other domain

Why to join us?

We are a group of result-oriented, motivated team players, our goal is to make the digital world better

We thrive to challenge bureaucratic workflows with disruptive innovation ideas and fast, market-ready implementation. Inventing, learning, and creating new things is a core value here.

We keep short daily standups to discuss our task, we also reserve time beyond for informal conversations on a weekly basis.

Our team rarely meets in person, we use optimized online communication platforms to help engaged, inspiring teamwork and productive individual contribution. (Slack, Miro, Trello, Github, Zoom, Figma, Zeplin).

We consider ourselves a professional self-education group, and we endeavor to acquire new, cutting-edge technology expertise. We constantly support each other in this journey, with reviews, pair programming and sharing the knowledge gained from any research topic monthly.

What do we offer?

- Flexible working location, potential for massive home office
- Fully flexible weekly 40 hours working schedule, in line with the priorities
- Competitive salary
- Inspiring environment, modern devices for development and testing
- Access to digital State of art, and even for financial technology conferences
- Here you will have all the freedom, technologies, and company you need to create
- We let you catch a break and unwind whenever you need to
